

Enterprise Erase Software

Eliminate your electronic data quickly and completely.

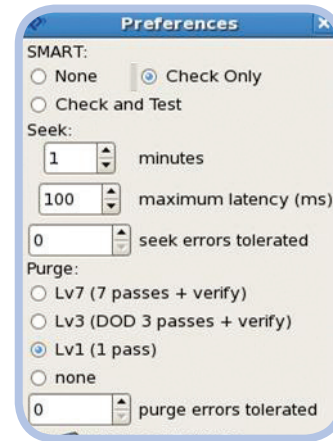

Tabernus' Enterprise Erase software is designed not only to securely and completely eliminate any electronic data contained on storage devices, but also to allow you the power to tailor the software to meet your unique situation. Unlike other data elimination software packages on the market that are rigid, Enterprise Erase can be customized to meet your needs.

Software designed to meet your unique requirements:

- Overwrite process configurability tailored to best work with your unique requirements, including:
 - Level of Overwrite
 - Choice of overwrite algorithm
 - Secure Erase (when applicable)
- User input fields available for barcode or unique data input
- Capable of erasing any drive type - SCSI, SATA, FC, SAS
- Hard drive diagnostic test capable (SMART, Seek) available on some versions
- User adjustable configurations via password protected screen
- Reports generated in .txt or .csv files for easy importing into Excel, others

- Intuitive user interface screen that displays all relevant process information including:
 - Hard drive serial number
 - Hard drive manufacturer and model number
 - Unique information input into user input field
 - Hard drive size
 - Completion percentage
 - Overwriting speed
