

## Enterprise Erase Client USB

### *Erase PCs, Laptops, and Servers easily with a USB thumb drive*

Enterprise Erase Client USB solution allows users to easily configure a common USB thumb drive and securely erase the hard drives in a PC, laptop, and even server. Users can transform a USB thumb drive into a bootable data erasure device that erases a system, manages the license usage, and collects data erasure reports. Enterprise Erase Client USB solution is the perfect solution for onsite computer data erasure or small volume computer erasure!

### **Advantages**

- Turn any USB thumb drive into a data erasure solution.
- Erase computer systems offline anywhere and anytime.
- A single USB drive can erase multiple PCs.
- Collect reports on the same thumb drive that erases the PC.
- No hardware costs. No shipping costs. No hardware dongles to lose or pay for.
- Set up time takes minutes.
- Generate reports of certificates of erasure compliant to R2, NAID, ADISA, and e-Steward audit standards.

### **Easy to Use**

Easy to use interface built for operators in mind.

- A USB thumb drive can be configured and licensed in less than 10 minutes.
- Simple process to add license usage to USB with a code. Easily add more as needed.
- Software is easy to use. Simply select drives to erase and click "Erase".
- PASS clearly displays Green. FAIL clearly displays RED.
- Each drive is displayed with clear progress meter bar and time to completion.

### **Generate Reports**

- Reports are automatically collected on the same USB that performs the erasure.
- Generate reports and certificates of erasure compliant to R2, NAID, ADISA, and e-Steward audit standards.
- Reports are provided in PDF, XML, and CSV.
- Easily import reports into Tabernus Database or your own.

### **Erase Methods Available**

Perform Data Erasure to any one of the numerous standards, including "Certified."

- US Department of Defense 5220.22M (3-pass)
- US Department of Defense 5220.22M (7-pass)
- US NIST 800-88
- CESSG "Certified" HMG IAS 5 Baseline and Enhanced
- Single pass
- And more

## What is Required?

- Any 1GB or greater USB 2.0 compatible thumb drive
- Tabernus Enterprise Erase USB installer (EXE.) Software.
- Access to Tabernus License portal

## Minimum Requirements for System Erasure

- Standard Computer System - x86 Intel/AMD based
- 256MB or more memory
- USB 2.0 compatible port
- Support for USB boot option
